Description

Currently seeking a Senior Golang Developer to join our tech team. As a Senior Golang Developer, you will be responsible for designing, developing, and maintaining high-performance and scalable backend systems using Golang. You will collaborate with cross-functional teams to define, design, and ship new features, ensuring code quality and adherence to best practices. Additionally, you will play a key role in troubleshooting and resolving complex issues and optimizing existing systems for performance, scalability, and reliability.

Key Responsibilities:

- Design, develop, and maintain high-performance and scalable backend systems using Golang
- Collaborate with cross-functional teams to define, design, and ship new features
- Participate in code reviews to ensure code quality and adherence to best practices
- Troubleshoot and resolve complex issues on time
- Optimize existing systems for performance, scalability, and reliability

*Full-time availability position aligned with Arkansas time-zone
